SENONI / FICTIONAL BUYER SCENARIO / DECLARED ASSUMPTIONS

All shares and index values below are synthetic, not market observations.

as_of = 2026-11-09

annual_volume = 10000

driver.materials = share:0.50; baseline_index:100; current_index:106; baseline_period:2026-01-01; current_period:2026-10-01

driver.energy = share:0.20; baseline_index:100; current_index:90; baseline_period:2026-01-01; current_period:2026-10-01

driver.labour = share:0.20; baseline_index:100; current_index:104; baseline_period:2026-01-01; current_period:2026-10-01

driver.freight = share:0.10; baseline_index:100; current_index:105; baseline_period:2026-01-01; current_period:2026-10-01

assumption = Baseline price moves proportionally with the declared index basket.

assumption = Cost shares are assumed; margin, FX, hedging and productivity are held constant.

assumption = Annual volume is an illustration, not committed demand or realised savings.
